Enumerate trait(s)
112
All traits defined?
118
No
Get next trait
120
Define interface for trait
122
Yes
Select top-level trait(s)
132
Define subtraits
124
Define one or more implementations
126
Select implementation(s) of top-level trait(s)
134
All subtraits have implementations?
136
No
Choose subtrait that lacks implementation
138
Select implementation for subtrait
140
Yes
End
142

EntryExitTradingSystem 901

Trait: TRADING_SYSTEM

Subtraits:
SECURITY,
TIME_FRAME,
ENTRY,
EXIT

Name: "Entry Exit Trading System"

Brief Description: "a system for buying and selling securities using an entry strategy and exit strategy"

Description: "This trading system buys and sells a single security within a specified timeframe. It uses an entry strategy to determine when to buy the security. It uses an exit strategy to decide when to liquidate the position."

ENTRY 902

Interface: TradingStrategy

Implementations: TrendEntryStrategy

Name: "Trading Strategy"

Brief Description: "a strategy for buying a financial securities"

Description: "The entry strategy determines when the security will be purchased, based on changes in the security's price."
